

**DR. LANCE BAUTISTA**

# **PEDIATRIC DENTISTRY**

**WHERE DENTAL ADVENTURES TAKE FLIGHT**

**DENTISTRY FOR CHILDREN & TEENS**

## WELCOME ABOARD

*Our goal is to provide quality dental care for your child in a positive environment that makes his or her visit memorable. Your child's experience in our aviation-themed office is designed to make every visit fun, while you and your child discover more about maintaining good oral health. We believe that if children enjoy coming to the dentist and understand the basics of taking care of their teeth, they will maintain good oral health habits for life.*

### About Dr. Bautista

Dr. Lance Bautista was raised in Modesto. He graduated from Oregon State University in 1983 with a BS in General Science. In 1992 Dr. Bautista graduated from UCLA with his DDS. Following 8 years in private practice, he returned to UCLA completing the two-year pediatric residency program in 2002. Dr. Bautista makes his home in Modesto with his wife and daughter. In his spare time Dr. Bautista prefers the skies to the roads, he received his pilot's license as a teenager and is currently a flight instructor and is rated in airplanes, seaplanes and helicopters.

### CHILDREN ARE NOT SMALL ADULTS

Pediatric Dentistry is the dental speciality devoted to children and patients with special needs. It requires additional years of training beyond general dentistry in such areas as growth and development, child psychology, medical conditions, pathology and orthodontic treatment. This advanced training allows us to provide children with the excellent dental care they deserve.

*Kids love our play areas and video features.*

## **OUR STATE-OF-THE-ART FACILITY FEATURES:**

### **DIGITAL RADIOGRAPHY**

We use digital x-ray technology that reduces your child's exposure to radiation by as much as 90% and completely eliminates the use of chemicals for developing film. It's better for your child and for the environment.

### **HIGH-TECH STERILIZATION**

Your child's safety is our first concern. For that reason our office features the state-of-the-art LISA medical grade sterilizer. This guarantees the highest possible level of protection for your family.

### **ANESTHESIA & SEDATION**

Most of our patients are so comfortable that they do not need any sedation, but for those who do we offer:

- Nitrous Oxide
- Conscious Sedation
- Intravenous Sedation

*Our friendly and knowledgeable staff will make your child's experience a positive one.*

## **BRING THE LITTLE ONES**

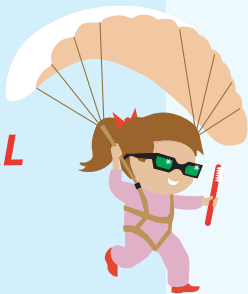

The American Academy of Pediatric Dentistry recommends that children make their first visit to the dentist before their first birthday or six months after they get their first tooth. At that visit we will examine your child looking for decay or other problems, and we will discuss diet, fluoride and dental care. It is a great opportunity for you to ask questions.
